BUZZKILL

Live Events Airspace Management &
Security Solutions

BUZZKILL

With drone technology becoming cheap, easily accessible, and often unregulated — including DIY kits and devices without genuine IP addresses — the live event space faces increasing risks.

BuzzKill steps in to address this urgent need by providing dedicated airspace management and security solutions, ensuring that live events remain safe from potential threats or mishaps.

About BuzzKill

BuzzKill protects high-profile events from the growing threat of unauthorized drones. With advanced detection and jamming systems, we neutralize rogue drones before they cause harm, while our airspace management services — from flight path design to production coordination — ensure a safe, disruption-free environment for artists, VIPs, and audiences.

BUZZKILL

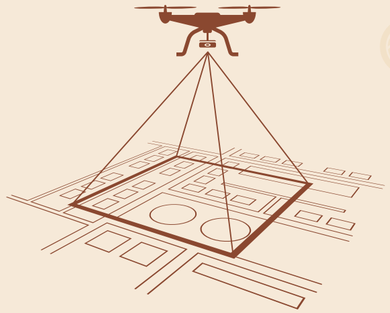

Our Core Services

BUZZKILL

Drone Detection & Jamming

- Neutralizes unauthorized drones by blocking their communication with operators via RF jamming and GPS spoofing.
- Effectively disables drones within a pre-defined radius, ensuring they cannot approach critical zones.

Airspace Management

- Designs pre-approved flight paths for authorized drones based on the event layout and security requirements.
- Ensures drones operate efficiently without entering restricted zones or interfering with other activities.
- Manage authorised drones and ensure the equipment passes the needed security checks.

BUZZKILL

The Process

Drone Detection & Jamming

Drone Detection

- BuzzKill deploys advanced RF scanning and radar systems to monitor the skies in real time.
- Identifies unauthorized drones within a 4 km perimeter.
- Tracks upto 40 drones simultaneously with rapid detection.
- Provides early warning before threats reach sensitive areas.
- Ensures event organizers have full situational awareness of aerial activity.

Drone Jamming

- Once a rogue drone is detected, BuzzKill activates its jamming systems to neutralize the threat.
- Uses RF disruption and GPS spoofing to block communication between drone and operator.
- Forces drones to land safely or prevents them from entering restricted zones.
- Protects against risks of unauthorized recording, disruptions, or physical harm.
- Guarantees a controlled, disruption-free airspace for performers, VIP guests, and attendees.

Tailored Airspace Management

Customized Flight Plans
Designs pre-approved flight paths for authorized drones based on the event layout and security requirements. Ensures drones operate efficiently without entering restricted zones or interfering with other activities.

Risk Mitigation
Identifies potential hazards in the airspace and integrates them into the flight plan to avoid accidents.

Equipment Checks
Making sure the drone designated for flights goes through checks in order to be compliant with the desired flight plans

Why BuzzKill?

6 LAC+
ROGUE DRONES

A data estimation study conducted by these agencies state that over 6 lakh unregulated drones, of various sizes and capacities, are present in the country and anyone of them can be used for launching a nefarious act by disruptive elements.

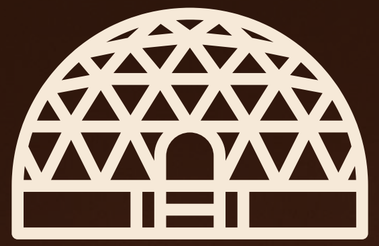

BUZZKILL

10-27%
PROJECTED GROWTH

The drone industry is experiencing significant growth, with global Compound Annual Growth Rates (CAGRs) projected to be around 10-27% through 2030-2034, with various market research firms offering slightly different forecasts due to varying methodologies. Growth is fueled by technological advancements like AI-powered autonomous systems and improved battery life, expanding applications in commercial sectors like agriculture, logistics, and inspection, and increasing government investment and adoption.

What You Get?

BUZZKILL

360°
Venue
Protection

We detect and block any unauthorised drones in and around a 4km radius of the venue. This ensures a completely controlled airspace during the show.

100%
Airspace
Control

With complete venue protection, customised flight plans and driver verification have complete control over your venue airspace.

Key Applications

BUZZKILL

VIP Guest Security

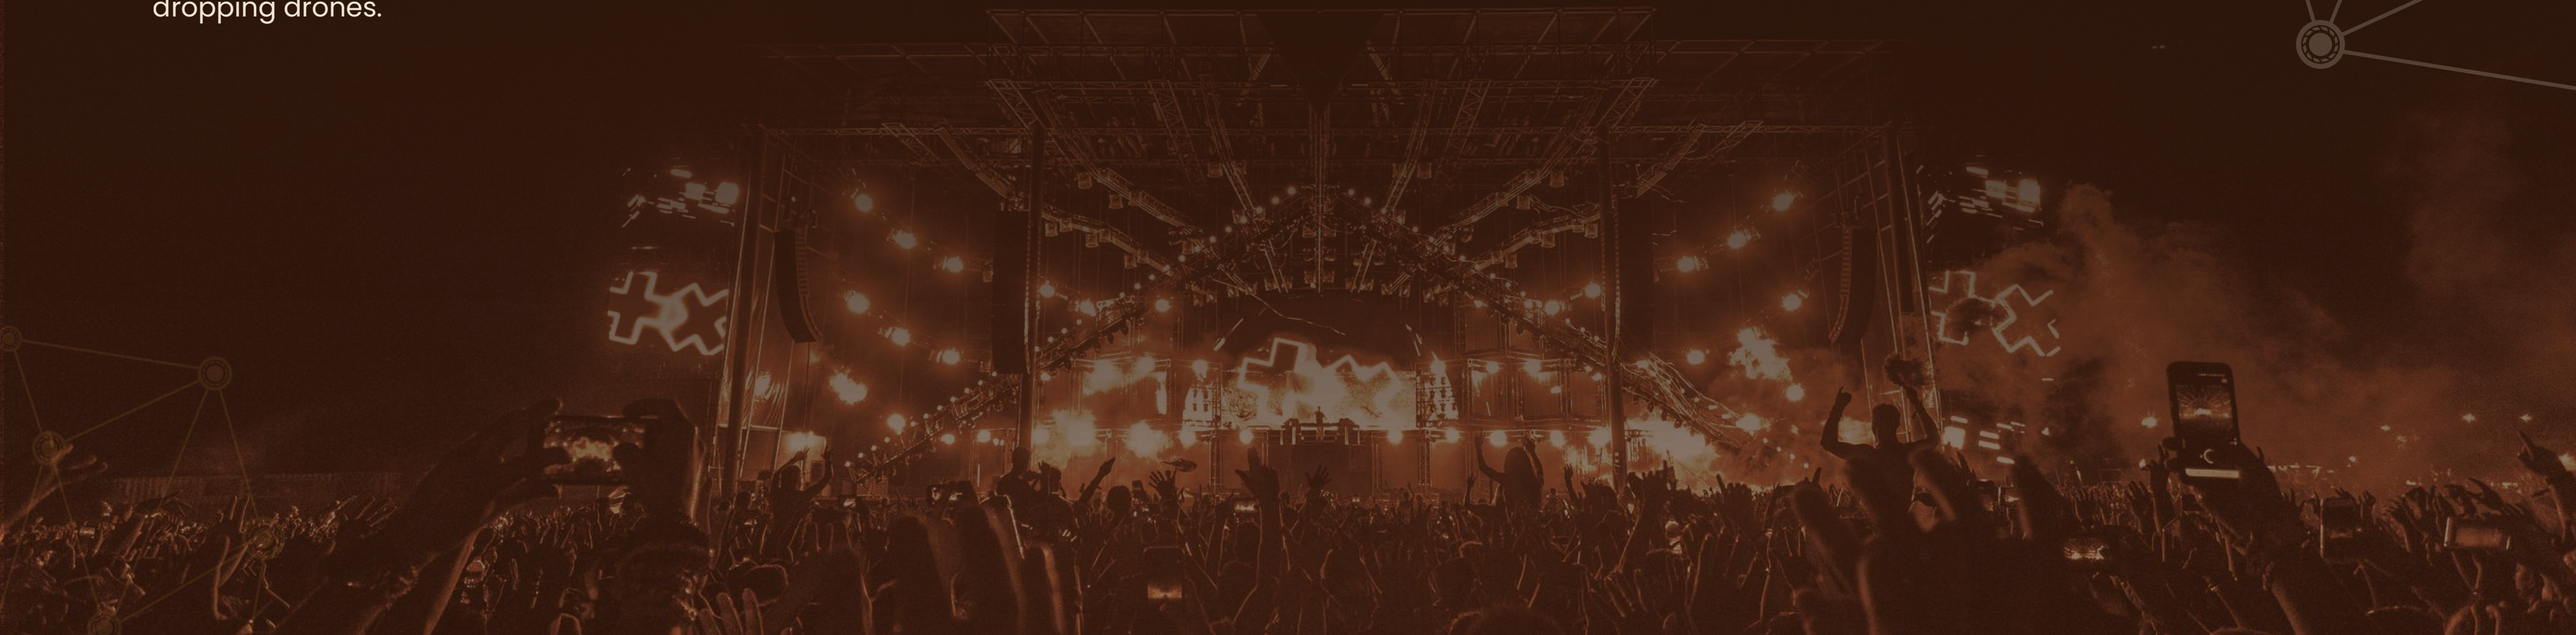

Creates a secure airspace around VIP zones to prevent unauthorized drones from invading privacy or causing harm.
Uses geofencing and jamming to enforce a no-fly zone over sensitive areas.

Protection for Performing Artists

Prevents unauthorized drones from approaching the stage, ensuring uninterrupted performances and artist safety.
Shields artists from potential aerial threats, such as unauthorized photography, surveillance, or object-dropping drones.

IP Infringement Protection

preventing IP infringement (intellectual property theft) is one of BuzzKill's strongest value points, especially for concerts, festivals, and high-profile shows.

DRONE DETECTOR

The Vajra Scan-G System ensures superior drone detection with a 4000-meters range, identifying threats in under 10 seconds. Using passive RF detection across 433 MHz, 840 MHz, 915 MHz, 2.4 GHz, and 5.8 GHz frequency bands, it offers 360° azimuth and 30° elevation coverage while tracking up to 10 drones simultaneously.

Weighting just 10 kg and powered by 220V–240V AC, it covers 99% of COTS drones. Designed for flexibility, the detector is ideal for vehicle-mounted or field deployments, safeguarding high-profile events and sensitive areas.

MULTI-FREQUENCY DETECTION

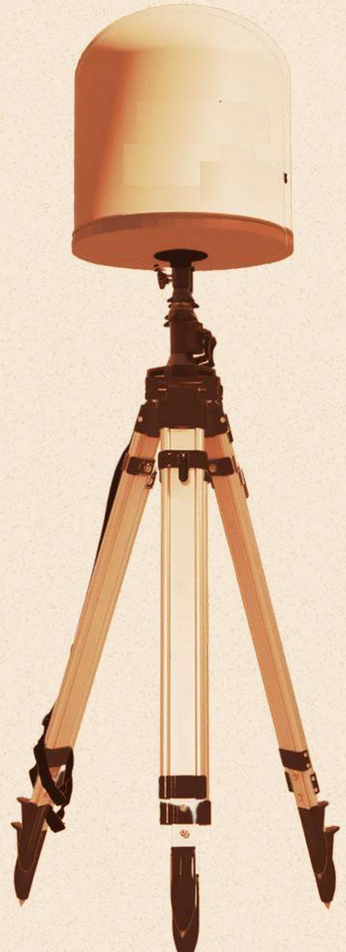

RF Detection:
433 MHz, 840 MHz, 915 MHz, 2.4 GHz & 5.8 GHz.
Monitoring:
Unauthorized drone detection

LONG DETECTION RANGE

Detection:
Upto 4000m radius
Surveillance:
360° Coverage

PORTABLE & RUGGED DESIGN

Compact:
Easy to carry
Durable:
Built for tough environments

SPECIFICATION

DETECTED DRONE TYPES	COTS & WiFi drones	**DETECTION METHOD**	Passive detection of RF signals
VISUALIZATION TRACKING	Displays Real -Time Flight Path & Pilot Location	**DETECTION RANGE**	Upto 4000 m radius
IDENTIFICATION	Brand, Model and Serial No.	**COVERAGE & DIRECTIONAL DETECTION**	360° azimuth, 30° elevation & +~ 20 degree
WEIGHT	10 kg	**POWER REQUIREMENTS**	220V–240V AC
DETECTION SPEED	< 10 seconds	**FREQUENCY BANDS**	433 MHz, 840 MHz, 915 MHz, 2.4 GHz, and 5.8 GHz.
TABLET SPECIFICATION	10-inch rugged Windows OS tablet, With IP65 & MIL-STD-810G	**EFFECTIVENESS**	Covers 99% of COTS drones by market volume

DRONE JAMMER GUN

The Vajra Shot represents a groundbreaking handheld anti-drone jammer, setting itself apart with its software-defined functionality. It possesses the unique ability to adapt its interference output frequency using software, effectively neutralizing a wide array of standard and non-standard unauthorized drones.

This jammer's compact and lightweight design not only ensures exceptional mobility but also makes it a prime choice for protecting crucial meetings, overseeing large-scale events, and conducting routine patrols in specific locations that demand reliable low-altitude security. Its innovative software-driven approach sets a new standard in countering the evolving challenges posed by unauthorized drones, offering a versatile and potent solution for safeguarding various scenarios.

SOFTWARE-CONTROLLED OPERATION

Control:
Flexible frequency adaptation
Precision:
Targets specific drone signals

HIGH MOBILITY

Portability:
Easy to carry and operate
Range:
Effective for up to 2 km

ROBUST DESIGN

Durability:
Built to withstand field conditions
Use:
Ideal for dynamic security needs

SPECIFICATION

JAMMING ABILITY & RANGE	2000m (Open environment, 0.1 W radiation/source)
JAMMING FREQUENCY	433 MHz, 840 MHz, 915 MHz, 2.4 GHz, and 5.8 GHz.
SOFTWARE CUSTOMIZABLE FREQUENCY BANDS	300 MHz–2500 MHz custom configuration
OVERALL WEIGHT	Self-check status and interference duration
LED DISPLAY	< 3.5 kg
POWER SUPPLY	Built-in Lithium battery

DRONE NEUTRALIZATION

Allows forced return-to-home and controlled vertical descent

PORTABLE & SIMPLE

The product is made of light weight materials, easy to carry: one-button start design, easy to operate

PROLONGED ENDURANCE

24/7 uninterrupted operation with simultaneous jamming at multiple frequencies.

Equipment Stack

Operations Led By Ex-Armed Forces Personnel

- **Expert-Led Operations:** All BuzzKill equipment is managed and operated by ex–Indian Army officers, bringing unmatched expertise in security and tactical operations.
- **Military-Grade Discipline:** Our teams apply battle-tested precision, discipline, and situational awareness to every deployment, ensuring absolute reliability during high-stakes events.
- **Trust & Credibility:** Backed by professionals with proven service records, BuzzKill offers a level of security that matches national defense standards.
- **Calm Under Pressure:** Trained to perform in the most demanding environments, our operators guarantee smooth, coordinated responses even under stress.
